BECOMING SCULPTURES IN THE SOUNDLESS RHYTHM OF MATTER

SCULTURE IN DIVENIRE, NEL QUIETO RITMO DELLA MATERIA

It is in matter that Venicem finds the creative drive that leads to the creation of its lamps and sculptural furniture. Taking shape through experimentation and mutation, Venicem's creations find their spaces within rooms, shaping them into evocative atmospheres. Its creative process can be outlined in a volume, a story that is told through three fundamental and indissoluble moments: *Process, Collections, and Ambiences.*

PROCESS

Process is the origin, where matter takes shape. Undertaking a creative process means being guided by matter, in a world of infinitive combinations. Indulging, understanding and challenging the intrinsic peculiarities of material allows one to find impetus that leads to new elaborations. In the balance of change, generated by the synergy between nature and high craftsmanship, forms come to life where imperfections are exalted in the achievement of unique forms of beauty.

COLLECTIONS

Collections show how Venicem lightings and furniture embody the evolution from the concept study to its physical birth into shapes that transcend time boundaries. On the path that begins with the materials, before they are translated into archetypal forms, experimentation leads to the creation of collections in which the furniture's strong presence and discreet refinement combine in heterogeneous sensitivity.

AMBIENCES

Ambiences captures the mixing together of materials and forms, as they find their own expressive space, indicating the most intimate nature of the settings, in which evocations arise from the furnishings that inhabit them. Light and matter enchant environments as they evolve, suggesting new interpretations to the observer. Venicem's collections, bearers of overwhelming emotion, give life to unique atmospheres in which to lose oneself in contemplation, encountering spaces made of profound sensations.

Nella materia Venicem trova la spinta creativa verso la realizzazione di lampade e arredi scultorei. Attraverso la sperimentazione e il mutamento prendono forma elementi d'arredo che trovano il proprio spazio negli ambienti, plasmandoli in atmosfere evocative. Il processo di creazione Venicem si delinea in un volume, un racconto in tre momenti fondamentali e indissolubili: *Process, Collections, Ambiences.*

PROCESS

Process è il principio, dove la materia prende forma. Intraprendere un processo di creazione significa farsi guidare dalla materia in un mondo di alternative e storie ancora da raccontare. Assecondare, comprendere e sfidare le peculiarità intrinseche dei materiali permette di trovare slanci verso rielaborazioni nuove. Nell'equilibrio del cambiamento, generato dalla sinergia tra natura e alta artigianalità, prendono vita volumi dove le irregolarità vengono esaltate nel raggiungimento di forme di bellezza uniche.

COLLECTIONS

Collections racconta il mutamento da materia a lampade e arredi Venicem, concepiti come parte di un unico corpus che supera i confini del tempo. Nel percorso che comincia con i materiali e si traduce in forme archetipiche, la sperimentazione porta alla realizzazione di collezioni in cui la forte presenza scenica e la raffinatezza discreta degli elementi d'arredo entrano in sintonia con sensibilità eterogenee.

AMBIENCES

Ambiences raggiunge la commistione tra materiali e forme che trovano il proprio spazio d'espressione; indica la natura più intima dei luoghi dove suggestioni nascono dagli elementi d'arredo che li popolano. La luce e la materia contaminano gli ambienti che evolvono suggerendo nuove interpretazioni all'osservatore. Le collezioni Venicem, portatrici di forti cariche emotive, danno vita ad atmosfere uniche dove perdersi in contemplazione e vivere uno spazio di sensazioni.

Founded in 2013 by Massimo Tonetto and Melissa Lunardi, Venicem creates lighting fixtures and sculptural furniture, positioning the company firmly within the international design field.

In 2023 Venicem not only celebrated its tenth anniversary, but the company also underwent a rebranding, thus consolidating an evolution characterised by its continued presence at international fairs, and the opening of its Milano showroom in the city's distinguished Durini Design District.

Venicem's headquarters are located where natural elements converge with the noble tradition of high quality Made-in-Italy craftsmanship. Influenced by its proximity to Venice, to which it has a profound connection, Venicem translates the richness of the surrounding territory into experimenting with materials and primary forms, in its realisation of timeless design for lighting and furnishing projects.

Fondata nel 2013 da Massimo Tonetto e Melissa Lunardi, Venicem realizza lampade ed arredi scultorei posizionandosi nel contesto del design internazionale.

Il 2023 ha segnato il processo di rebranding Venicem, in concomitanza con i 10 anni di attività, che consolida un percorso evolutivo distinto dalla presenza costante alle fiere internazionali e dall'apertura dello showroom a Milano, nell'importante vetrina del Durini Design District.

Venicem colloca la sua sede in un luogo dove elementi naturali si amalgamano a una nobile tradizione artigianale di alta qualità Made in Italy. Influenzata dalla vicinanza con Venezia, a cui è profondamente legata, traduce la ricchezza del territorio che la circonda in sperimentazione tra materiali e forme primarie nella realizzazione di design senza tempo per progetti lighting e d'arredo.

BORDO
LUCIDO

Ø MIN 300
E = 2,8mm

The intangibility of light converses with the materiality of metal. Bissa Suspension is a lamp that is characterized by an evocative délabré burnished brass structure, supported by adjustable steel cables. An LED strip runs through its sinuous curves, generating a trail of light that seems to be suspended in space.

L'intangibilità della luce dialoga con la materialità del metallo. Bissa Suspension è la lampada caratterizzata da un'evocativa struttura in ottone brunito délabré, sostenuta da cavi regolabili in acciaio. Lo strip LED percorre le sinuose curve generando una scia di luce che sembra rimanere in sospensione nello spazio.

Light passes through the openings of our Blade Coffee Table, creating a play of shadows on surrounding surfaces. Canaletto wood slats, placed in a radial pattern, both support and frame the precious blended burnished metal top. Whether one prefers higher and thinner, or lower and wider, Blade Coffee Table can be used as a system, or as a single piece of furniture.

In Blade Coffee Table la luce attraversa le aperture creando un gioco di ombre sulle superfici. Le lamelle in noce di Canaletto, poste a raggiera, sono allo stesso tempo sostegno e cornice del prezioso piano in metallo brunito sfumato. Più alto e snello o più basso e largo, Blade Coffee Table può essere utilizzato come sistema o come singolo complemento d'arredo.

The Chic series propagates luminous alchemy through a sculptural design. Its Murano glass trihedrons, available in three colors, give rise to rays of light that trace radial geometries throughout the surrounding space. The lampshade and base, made of light striped bronze, add intensity to the lightness of the glass. Chic is available in floor and table versions.

La serie Chic propaga alchimie luminose attraverso un design scultoreo. I triedri in vetro di Murano, disponibili in tre colorazioni, danno vita a raggi di luce che tracciano geometrie radiali nell'ambiente. Il paralume e la base, in bronzo striato chiaro, aggiungono intensità alla leggerezza del vetro. Chic è disponibile nelle versioni a terra e da tavolo.

The Circle series is based on a simple circle shape. The structure consists of disks surrounded by rings that seem to be suspended. Indirect light illuminates the environment, generating shadows and reflections that amalgamate with and complement each other. Circle includes suspended, wall and table versions. The table version's self-supporting base holds a lampshade that seems to float; also available in a portable and rechargeable version, Circle Table Portable is an expression of freedom of movement.

La serie Circle si sviluppa dalla forma pura del cerchio. La struttura si compone di dischi cinti da anelli che sembrano sospesi. La luce indiretta illumina l'ambiente generando ombre e riflessi che si amalgamano e completano. Circle comprende soluzioni a sospensione, a parete e da tavolo. Nella versione da tavolo, la base autoportante sostiene il paralume che appare leggero e sospeso; disponibile anche portatile e ricaricabile, Circle Table Portable si fa espressione della libertà di movimento.

The purity of its Murano glass tubular diffusers encapsulates the light, giving it an enveloping softness. Its joints, in light or dark burnished brass, have almost imperceptible details that denote extreme stylistic attention to detail. Our Cross lamps are available in a suspended version — with three adjustable light sources — and a wall version with a single fixed source.

La purezza dei diffusori tubolari in vetro di Murano incapsula la luce donandole una morbidezza avvolgente. Gli snodi, in ottone brunito chiaro o scuro, presentano dettagli quasi impercettibili che denotano una cura stilistica estrema. Le lampade Cross sono disponibili nelle versioni a sospensione, con tre sorgenti luminose orientabili, e a parete, con una singola sorgente fissa.

Murano glass trihedrons diffuse light into the environment, projecting evocative reflections throughout the surrounding space. The Crown family of lamps consists of luminous sculptures made up of a metal structure that frames its trihedrons, further enhancing their luster. This series includes ceiling, wall and suspended versions.

Triedri in vetro di Murano diffondono luce nell'ambiente delineando riflessi suggestivi negli spazi circostanti. La famiglia di lampade Crown si compone di sculture luminose formate da una struttura in metallo che incornicia i triedri esaltandone lo splendore. La serie comprende le versioni a soffitto, a parete e a sospensione.

Our Equilibre Coffee Table is defined by the harmony of the shapes of which it is composed. A smoke grey or sea blue blown glass base supports a refined top, made of brass or blended burnished copper, which resembles a tray. Light passes through the glass, projecting soft reflections onto the surrounding surfaces.

Equilibre Coffee Table è definito dall'armonia delle forme che lo compongono. La base in vetro soffiato, grigio fumé o blu mare, sostiene un raffinato piano in ottone o rame brunito sfumato, che evoca un vassoio. La luce attraversa il vetro delineando morbidi riflessi sulle superfici circostanti.

With our Essence collection lamps, the projecting extremities of their simple square forms diffuse light that is warm and welcoming. Arms extending from a central plate create contrasts of light and shadows on the walls. Noble materials such as pewter, antiqued copper, and matte black nickel render the perception of matter tangible. The Essence series comes in two wall versions, with three and four arms respectively.

Nelle lampade della collezione Essence, la forma primaria del quadrato proietta le sue estremità diffondendo una luce calda e accogliente. Le estensioni delle braccia, attorno al piatto centrale, modellano contrasti di luce e ombra sulle pareti. Materiali nobili come peltro, rame anticato e nickel opaco, rendono tangibile la percezione della materia. La serie Essence si compone di due versioni a parete a tre e a quattro braccia.

The Glam series' simple square shape was chosen to be the protagonist of a compact design with architectural features. The lamps are characterized by a pewter shell that, combined with brass, enhances the material effect of the metal and its imperfections. A white glass screen diffuses light throughout the environment. The Glam family includes table and wall versions.

Nella serie Glam, la forma primaria del quadro viene eletta protagonista di un design compatto e dai tratti architettonici. Le lampade sono caratterizzate da una scocca in peltro che, combinata con l'ottone, esalta l'effetto materico del metallo e le sue irregolarità. Uno schermo in vetro bianco diffonde la luce nell'ambiente. La famiglia Glam comprende una versione da tavolo e una a parete.

Our Grace Suspension lamp looks like a material fragment floating in space. Crystal, amber, or smoke colored Murano blown glass trihedrons shape the light of LEDs positioned in its central cylindrical body, propagating it throughout the surrounding space. Formal rigor and elegance meet in a suspended structure, where the lightness of the glass acquires an intense expressive energy.

La lampada a sospensione Grace Suspension si presenta come un frammento materico che fluttua nello spazio. Triedri in vetro soffiato di Murano, color cristallo, ambra o fumé, modellano la luce generata dai LED, posizionati nel corpo cilindrico centrale, e la propagano nell'ambiente. Rigore formale e eleganza si incontrano in una struttura sospesa dove la leggerezza del vetro acquista un'intensa carica espressiva.

The Kitami collection consists of lamps that originate from pure geometric elements. A metallic structure is defined by solid intersecting bars, while discreet satin glass light sources, positioned at the end of rods, diffuse light in its most essential form. The Kitami series includes wall and suspended versions.

La collezione Kitami si compone di lampade che traggono le proprie origini da elementi geometrici puri. Solide barre intersecate tra loro ne definiscono la struttura metallica, mentre discrete sorgenti luminose in vetro satinato, poste all'estremità delle aste, diffondono la luce nella sua forma più essenziale. La serie Kitami include una versione a parete e una a sospensione.

The Less System is a design that marks an evolution in the concept of light architecture. A combination of plain luminous rods, or with satin glass spherical diffusers, defines compositions of up to five elements, which may be arranged horizontally or vertically. Light emanates from different sources, reflecting off structural metals, such as burnished natural brass or polished or matte black nickel.

Less System è il progetto che evolve il concetto di architettura di luce. Una combinazione di aste luminose, semplici o con diffusori sferici in vetro satinato, definisce composizioni fino a cinque elementi, disposti in orizzontale o verticale. La luce sprigiona dalle differenti sorgenti, riflettendosi su metalli strutturali come l'ottone naturale brunito o il nickel nero lucido o opaco.

Delicate spheres seem to float weightlessly in the air, supported by a discreet burnished brass structure. The Murano blown white glass lampshades' primary shapes create an atmosphere of lightness, in this purist interpretation of light. Expert craftsmanship highlights materials that become incorporeal, while luminosity is diffused gently throughout the surrounding space. The Misty lamp collection is available in table and suspended versions.

Delicate sfere sembrano fluttuare prive di peso, sostenute da una discreta struttura in ottone brunito. La forma primaria dei paralumi in vetro bianco soffiato di Murano genera un'atmosfera di leggerezza in un'interpretazione purista della luce. L'esperta lavorazione artigianale mette in risalto i materiali che diventano incorporei mentre la luminosità si diffonde delicatamente nell'ambiente. La collezione di lampade Misty è disponibile nelle versioni da tavolo e a sospensione.

The Mondrian Glass series interprets pure design that transforms geometric shapes into sculptures of light. The lamps of this collection are characterized by the rigorous lines of their rectangles, which are softened by spherical white Murano glass diffusers. Coming into contact with its matte or polished black nickel, burnished natural brass or polished gold structure, the light generates luminous reflections that enhance the materiality of the metal. Mondrian Glass is available in ceiling, wall and floor versions.

La serie Mondrian Glass interpreta un design puro che trasforma forme geometriche in sculture di luce. La lampade della collezione si contraddistinguono per le linee rigorose del rettangolo, ammorbidite dai diffusori sferici in vetro bianco di Murano. La luce, a contatto con la struttura in nickel nero opaco o lucido, ottone naturale brunito o oro lucido, genera riflessi luminosi che esaltano la matericità del metallo. Mondrian Glass è disponibile nelle versioni a soffitto, a parete e da terra.

The Mondrian LED series' solid rectangle shape is reinterpreted in elegant lines. A rigorous metal structure, traversed by LEDs, unfolds in precise geometric intersections that radiate indirect light, revealing the peculiarities of the material. The Mondrian LED collection includes ceiling and wall versions.

Nella serie Mondrian LED, la solida forma del rettangolo viene reinterpretata in eleganti linee. La rigorosa struttura in metallo percorsa da LED, si sviluppa in precisi incroci geometrici che irradiano una luce indiretta rivelando le peculiarità della materia. La collezione Mondrian LED si compone di versioni a soffitto e a parete.

The evocative lines of our Numa lamps draw inspiration from ancient architectural elements; recalling the lines of a column, they diffuse sculptural light into the surrounding space. This collection is characterized by a dark burnished brass structure that frames its Murano blown glass trihedrons, further enhancing their elegance. Available in crystal, amber or smoke grey glass, the series includes suspended, wall and floor versions.

Le suggestive linee delle lampade Numa traggono ispirazione da elementi architettonici antichi; riprendendo i tratti di una colonna, diffondono una luce scultorea nell'ambiente. La collezione si caratterizza per una struttura in ottone brunito scuro che incornicia i triedri in vetro soffiato di Murano esaltandone l'eleganza. Disponibile in vetro color cristallo, ambra o grigio fumé, la serie comprende le versioni a sospensione, a parete e da terra.

Open Bookcase is a system of formal rigor, designed to partition and organize spaces. Its geometric layout accentuates the clean lines of its blended burnished copper structure, made up of height-adjustable vertical poles and trays, and which is softened by meticulous hand finishing. This system broadens one's compositional options, allowing for a range of modular installations.

Open Bookcase è un sistema dal rigore formale, progettato per suddividere gli spazi e garantire l'ordine. Lo schema geometrico accentua le linee nette della struttura in rame brunito sfumato, composta da aste verticali regolabili in altezza e da vassoi, ingentiliti da un'attenta rifinitura realizzata a mano. Il sistema espande le possibilità compositive e permette differenti modularità.

Linearity and elegance define the Optical collection through noble materials and primary forms that meet and blend to create the perfect balance. A burnished brass structure supports delicate Murano glass trihedrons that diffuse soft light throughout the surrounding space. Available in crystal, amber and smoke grey glass, the Optical series comes in wall, floor, and table versions, as well as two suspended versions.

Linearità ed eleganza definiscono la collezione Optical attraverso materiali nobili e forme primarie che si incontrano e si amalgamano in perfetto equilibrio. La struttura in ottone brunito sostiene delicati triedri in vetro di Murano che diffondono una morbida luce nell'ambiente. Disponibile in vetro color cristallo, ambra e grigio fumé, la serie Optical si declina in lampade a parete, da terra, da tavolo e in due versioni a sospensione.

A central rod with rigorous lines is interrupted as it collects joints of light. Our Pinocchio Floor lamp's adjustable metal bars, spheres and Murano blown glass trihedrons serve as points of light and luminous extremities. A solid metal structure, which is available in two different finishes, consolidates its linearity through the two spherical black nickel or polished gold joints.

Un'asta centrale dalle linee rigorose si interrompe nel raccogliere snodi di luce. Nella lampada da terra Pinocchio Floor, barre in metallo orientabili, sfere e triedri in vetro soffiato di Murano sono punti luce ed estremità luminose. La solida struttura in metallo, disponibile in due differenti finiture, consolida la sua linearità attraverso i due snodi sferici in nickel nero o oro lucido.

With its rigorous and functional lines, the Rectus collection comes to life, characterized by its burnished brass or black nickel tubular structure. Warm and punctual light propagates from the adjustable light point at the end of the stem, making these lamps versatile lighting solutions. The Rectus series includes floor, table and wall versions.

Disegnata da linee rigorose e funzionali prende vita la collezione Rectus, contraddistinta da una struttura tubolare in ottone brunito o nickel nero. Una luce calda e puntuale si propaga dal punto luce orientabile posto all'estremità dello stelo, rendendo queste lampade soluzioni d'illuminazione versatili. La serie Rectus comprende le versioni da terra, da tavolo e a parete.

Elements with heterogeneous volumes evolve into compact compositions. Our Ring Coffee Table's central body, which is intersected by two concentric protruding planes, enhances the tangibility of the material of which it is forged; the craftsmanship of the blended burnished metal gives life to nuances and imperfections that add unpredictability to the geometric accuracy of its shapes and materials. Our Ring Coffee Table is available in two sizes.

Elementi dai volumi eterogenei si evolvono in composizioni compatte. Il solido corpo centrale di Ring Coffee Table, intersecato dai due piani concentrici e sporgenti, esalta la tangibilità della materia di cui è forgiato; la lavorazione artigianale del metallo brunito sfumato, dà vita a nuance e irregolarità che aggiungono imprevedibilità alla geometrica esattezza di forme e materiali. I tavolini Ring Coffee Table sono disponibili in due misure.

Stone and metal, etched and shaped by expert hands, give life to an aesthetic that has its roots in the contrast between form and matter. Our Rock Coffee Table consists of an inverted cone top made of délabré brass, set in a block of open-pore travertine marble. Two elements and a meeting of balance and proportions are reconfigured as a cantilever table with an asymmetrical design.

La pietra scavata e il metallo modellato da mani esperte danno vita ad un'estetica che affonda le proprie radici nel contrasto tra forma e materia. Rock Coffee Table è composto da un piano a cono rovesciato in ottone délabré, incastonato in un blocco di travertino lavorato a poro aperto. Due elementi e un incontro di proporzioni ed equilibri che si riconfigura in un tavolino a sbalzo dal design asimmetrico.

The Root One lamp collection is characterized by the linearity of its cylinder and the material exploration of light. A brushed burnished brass structure supports tubular blown Murano glass diffusers that shape the light into a concrete form before diffusing it, creating a warm and evocative atmosphere.

La collezione di lampade Root One trova forma attraverso la linearità del cilindro in una esplorazione materica della luce. La struttura, in ottone brunito spazzolato, sostiene diffusori tubolari in vetro soffiato di Murano che modellano la luce in forma concreta e la diffondono dando vita a un atmosfera calda e suggestiva.

Our Roots Chandelier is characterized by a dark burnished brass branched structure that is capable of housing ten or twenty light sources. Through white Murano blown glass tubular diffusers, light is shaped into concrete forms that follow the clean lines of the cylinder, creating a warm and evocative atmosphere.

L'elemento caratterizzante di Roots Chandelier è la struttura ramificata in ottone brunito scuro, capace di sostenere dieci o venti fonti luminose. Attraverso diffusori tubolari in vetro soffiato bianco di Murano, la luce viene modellata in forme concrete che seguono le linee pulite del cilindro generando un'atmosfera calda e suggestiva.

The machining process of the surfaces of our Serge Cabinet creates three-dimensional effects. The protrusions and recesses of the three doors' rigorous profiles define the essential elements of the structure, coming together in imposing physicality. Its antiquated glass top reflects and amplifies the surfaces of one's living space, assuming new expressions. Serge Cabinet is available in two and three door versions.

Effetti di tridimensionalità sono generati dalla lavorazione della superficie di Serge Cabinet. Sporgenze e rientranze dei profili rigorosi delle ante definiscono gli elementi essenziali della struttura e si combinano in una fisicità imponente. Il top in vetro anticato riflette e amplifica le superfici dello spazio abitativo assumendo nuova espressione. Serge Cabinet è disponibile nelle versioni a due e a tre ante.

Imposing legs with rigorous profiles create three-dimensional effects through their protrusions and recesses. The burnished copper or dark striped brass structure of Serge Table and its cipollino ondulato rosso or travertine marble top, define its essential elements, combining in a monumental physicality that adds solemnity to this table.

Imponenti gambe dai rigorosi profili generano effetti di tridimensionalità dati da sporgenze e rientranze. La struttura di Serge Table in rame brunito o bronzo striato scuro e il suo piano in marmo cipollino ondulato rosso o marmo travertino, ne definiscono gli elementi essenziali combinandosi in una fisicità monumentale, che conferisce solennità al tavolo.

Two discs of light supported by a discreet central rod float incorporeally in the surrounding space. Our Soul Suspension lamp filters a dense glow through the soft and enveloping materials that make up the two superimposed satin glass and metal diffusers. The light burnished brass or matte black central stem reinforces the delicate and suspended presence of the light.

Due dischi di luce, sostenuti da una discreta asta centrale, fluttuano incorporei nell'ambiente. La lampada Soul Suspension filtra un chiarore denso attraverso le materie, morbide e avvolgenti, che compongono i due diffusori sovrapposti in vetro satinato e metallo. Lo stelo centrale, in ottone brunito chiaro o nero opaco, rafforza la presenza delicata e sospesa della luce.

Our Spear lamps assimilate into spaces with an elegant presence that translates simple shapes into iconic light compositions. Delicate metal rods shape luminous intersections by drawing reflections in the surrounding space through spherical Murano glass diffusers and LEDs. Spear lamps are available in ceiling and suspended versions.

Le lampade Spear si inseriscono nello spazio con un'elegante presenza che traduce forme semplici in composizioni di luce iconiche. Delicate aste in metallo modellano incroci luminosi disegnando riflessi nell'ambiente attraverso diffusori sferici in vetro di Murano e LED. Le lampade Spear sono disponibili nelle versioni a soffitto e sospensione.

Star Cabinet dominates spaces with its sculptural presence. Three-dimensional materiality is lent to a single marble slab, which rests on solid blended burnished copper trapezoidal feet — in the cipollino ondulato rosso marble finish — or flat basement, in the white Carrara marble version. Star Cabinet's combination of different materials, united by a common iconographic purity, interprets the dialogue between craftsmanship and design.

Star Cabinet sovrasta l'ambiente con la sua presenza scultorea. La sua matericità tridimensionale è data dalla lavorazione a lingotti di un'unica lastra di marmo che poggia su piedini a trapezio in rame brunito sfumato nella versione in marmo cipollino ondulato rosso o su un basamento piatto, nella versione in marmo di Carrara. In Star Cabinet, l'accostamento di materiali diversi, accomunati dalla stessa purezza iconografica, interpreta il dialogo tra artigianalità e design.

Irregular asymmetrically cut blown glass balls hover in space, creating a series of bodies of light and shadow, fullness and emptiness. The light burnished brass or matte black rod that supports the dove-colored glass diffusers holds the weight of the material, making our Trou Suspension lamp an ethereal light source.

Irregolari sfere in vetro soffiato, dal taglio asimmetrico, si librano nello spazio creando ripetizioni di luci e ombre, pieni e vuoti. L'asta in ottone brunito chiaro o opaco nero, che sostiene i diffusori in vetro color tortora, sospende il peso della materia rendendo la lampada Trou Suspension una fonte di luce eterea.

Our Unique lamps are the result of a journey of experimentation that leads to the purity of forms. This collection explores the consistency of the cylinder through its soft and enveloping lines, and the lightness of the glow that passes through it. Four glass diffusors, available in white satin, polished white or amber alabaster, are supported by a light burnished brass structure. Unique is available in a suspended version with four diffusers, or as a wall version with a single light source.

Le lampade Unique sono il risultato di un percorso di sperimentazione che conduce alla purezza delle forme. La collezione esplora la consistenza del cilindro nelle sue linee, morbide e avvolgenti, e nella leggerezza della luce che lo attraversa. I diffusori in vetro, disponibili in bianco satinato o lucido e in alabastro ambra, sono sostenuti da una struttura in ottone brunito chiaro. Unique è disponibile nella versione a sospensione, dotata di quattro diffusori, e a parete, con una singola sorgente luminosa.

The top's micro-perforated metal defines the contours of a delicate structure, allowing natural light to filter through that outlined patterns of light on surrounding surfaces. Our Urban Coffee Table's three light burnished brass crosspieces divide the top into homogeneous triangles, and end in solid support legs. Soft and simple profiles enhance the essentiality of the materials.

Il metallo micro-forato del piano definisce i contorni della delicata struttura lasciando filtrare la luce naturale, che delinea schemi luminosi sulle superfici circostanti. In Urban Coffee Table, tre traversi in ottone brunito chiaro suddividono il piano in triangoli omogenei e terminano nelle solide gambe di appoggio. Profili morbidi e semplici esaltano l'essenzialità dei materiali.

Burnished brass inserts applied to a Murano glass parallelepiped evolve into a sculpture of suspended light; Utmost Suspension's geometric patterns transform matter into an instrument of design. Plays of fullness and emptiness result from natural and artificial light, as it passes freely through bronze colored glass.

Inserti in ottone brunito applicati ad un parallelepipedo in vetro di Murano evolvono in una scultura di luce sospesa; in Utmost Supension, pattern geometrici trasformano la materia in strumento di design. Giochi di pieni e vuoti si creano mediante la luce, naturale e artificiale, che attraversa liberamente il vetro color bronzo.

Our VCM Table lamp's functional elements define a formal study of light. The rigorous dark or blended burnished brass structure is composed of a few essential elements; a vertical rod supports a horizontal arm, where warm diffused LED light is channeled by blades that direct it downwards.

Nella lampada da tavolo VCM Table, gli elementi funzionali definiscono la ricerca formale della luce. La rigorosa struttura in ottone brunito scuro o sfumato è composta da pochi elementi essenziali; un'asta verticale sostiene il braccio orizzontale, dove una luce a LED, calda e diffusa, viene incanalata dalle lamelle che la direzionano verso il basso.

Our Wave Coffee Table inspires a dialogue between architecture and design, exploring the balance between different materials. The tension created between the curved glass parabola of the base and its rectangular top gives rise to structural and, at the same time, aesthetic elements. The contrast between the light burnished brass raw material, and the purity of its smoke grey glass, outlines its minimalism and elegance.

Il tavolino Wave Coffee Table stimola il dialogo tra architettura e design, esplorando l'equilibrio tra materiali diversi. La tensione generata tra la parabola in vetro curvato della base e il piano rettangolare dà vita a elementi strutturali e al contempo estetici. Il contrasto tra la materia grezza dell'ottone brunito chiaro e la purezza del vetro grigio fumé delinea minimalismo ed eleganza.

Our Zoe lamps explore the archetype of the circle, through dynamism and the compositional balance of shapes. Two rings — available in gold, black nickel, polished chrome or light burnished brass — intersect, reflecting and amplifying the light. Three round Murano blown glass diffusers contrast with the black nickel, gold, or polished chrome spheres. Zoe is available in floor and table versions.

Nelle lampade Zoe l'archetipo del cerchio viene esplorato attraverso la dinamicità e l'equilibrio compositivo delle forme. Anelli in oro, nickel nero, cromo lucido od ottone brunito chiaro, si intersecano riflettendo ed amplificando la luce.
I diffusori tondi in vetro soffiato di Murano si contrappongono a sfere in nickel nero, oro o cromo lucido. Zoe è disponibile nella versione da terra e da tavolo.

CANALETTO

The intensity of the materials provides Venicem with the impetus for re-elaboration. Metal, glass, stone, and wood acquire distinctive irregularities thanks to the transformation process.

METAL

The metals are subjected to manual oxidation, scratching, burnishing, and polishing processes that give rise to heterogeneous and evocative chromatic effects. Surfaces are enriched with irregularities whose variations in shade and contrast are accentuated in a play of harmony when the light strikes them. Through unique finishes, materials take on a privileged role in an archetypal vision of forms.

GLASS

Through the careful work of skilled craftsmen, light sculptures come to life. Hand-blown glass is tinged with tinting paste to create refined shades, to which small amounts of glass-based oxides are added during processing. Matrices give concrete shape to matter, while the colors obtained enrich the light, which shines through and penetrates the material in luminous alkyls.

MARBLE

High precision cutting processes, abrasion techniques, and assembly methods are used in shaping the material, enhancing its peculiarities. In the hands of experts, marble and stone become ductile and can be enriched with details that, when interacting with light, generate heterogeneous nuances and lend depth-creating effects to furnishings.

WOOD

Intense colors and characteristic light and dark streaks give life to the wood, giving each piece uniquely different hues. Shaped using noble artisanal techniques, the material is enhanced by the intricate patterns of its grain, which assume a vigour and depth that generates new and multifaceted visual effects on its surfaces. A natural material that acts as a support and frame in the creation of exclusive furnishing elements.

Nell’intensità dei materiali, Venicem trova lo slancio per una rielaborazione nuova. Metallo, vetro, pietra e legno acquisiscono irregolarità distintive grazie a un processo di trasformazione.

METALLO

I metalli vengono sottoposti a processi manuali d’ossidazione, graffiatura, brunitura e lucidatura che danno vita ad effetti cromatici eterogenei ed evocativi. Le superfici si arricchiscono di irregolarità e la luce, colpendole, accentua le variazioni di tonalità e i contrasti, in un gioco di armonie. Attraverso finiture uniche, i materiali assumono un ruolo privilegiato in una una visione archetipica delle forme.

VETRO

Attraverso il lavoro accurato di artigiani esperti, sculture di luce prendono vita. Il vetro soffiato a mano si tinge di raffinate sfumature originate dalla colorazione in pasta, dove piccole quantità di ossidi a basa vetrosa vengono aggiunte durante la lavorazione. Matrici danno forma concreta alla materia mentre le colorazioni ottenute arricchiscono la luce, che risplende e attraversa il materiale in alchile luminose.

MARMO

Processi di taglio ad alta precisione, tecniche abrasive e metodi di assemblaggio vengono utilizzati nel modellare la materia esaltandone le peculiarità. Tra mani esperte, il marmo e la pietra si fanno duttili e possono essere arricchiti di dettagli che, interagendo con la luce, generano nuance eterogenee e donano effetti di profondità agli arredi.

LEGNO

Il colore intenso e le caratteristiche striature chiare o scure danno vita al legno rendendolo sempre diverso nelle sue sfumature. Modellata attraverso tecniche artigianali nobili, la materia si eleva e l’intricato motivo di venature assume vigore e profondità, generando effetti visivi nuovi e poliedrici sulle superfici. Un materiale naturale che diventa supporto e cornice in elementi d’arredo esclusivi.
