

Metal Affinities is an invitation to explore the world of design through the distinctive lens of De Castelli. Metal expresses itself in a fluid manifestation of its essence: a universal material that shapes space, integrating seamlessly in perfect harmony. These affinities, surpassing the very surface of perception, fade into the unsaid: a whispered invitation to discover the most intimate connections of beauty.

Metal Affinities è un invito a esplorare il mondo del design attraverso la lente distintiva di De Castelli. Il metallo si esprime in una manifestazione fluida della sua essenza: una materia universale che plasma lo spazio integrandosi in perfetta armonia. Queste affinità, che superano la superficie stessa della percezione, sfumano nel non detto: un invito sussurrato a scoprire le connessioni più intime della bellezza.

Sedimenti Wall cladding

DESIGN BY BOATTOMARTINO STUDIO

Like a geological landscape, Sedimenti recounts the passage of time through textural stratification, echoing of the processes of nature. The result is expressive and dynamic, a surface which inspires awe, exalted by a unique combination of elements.

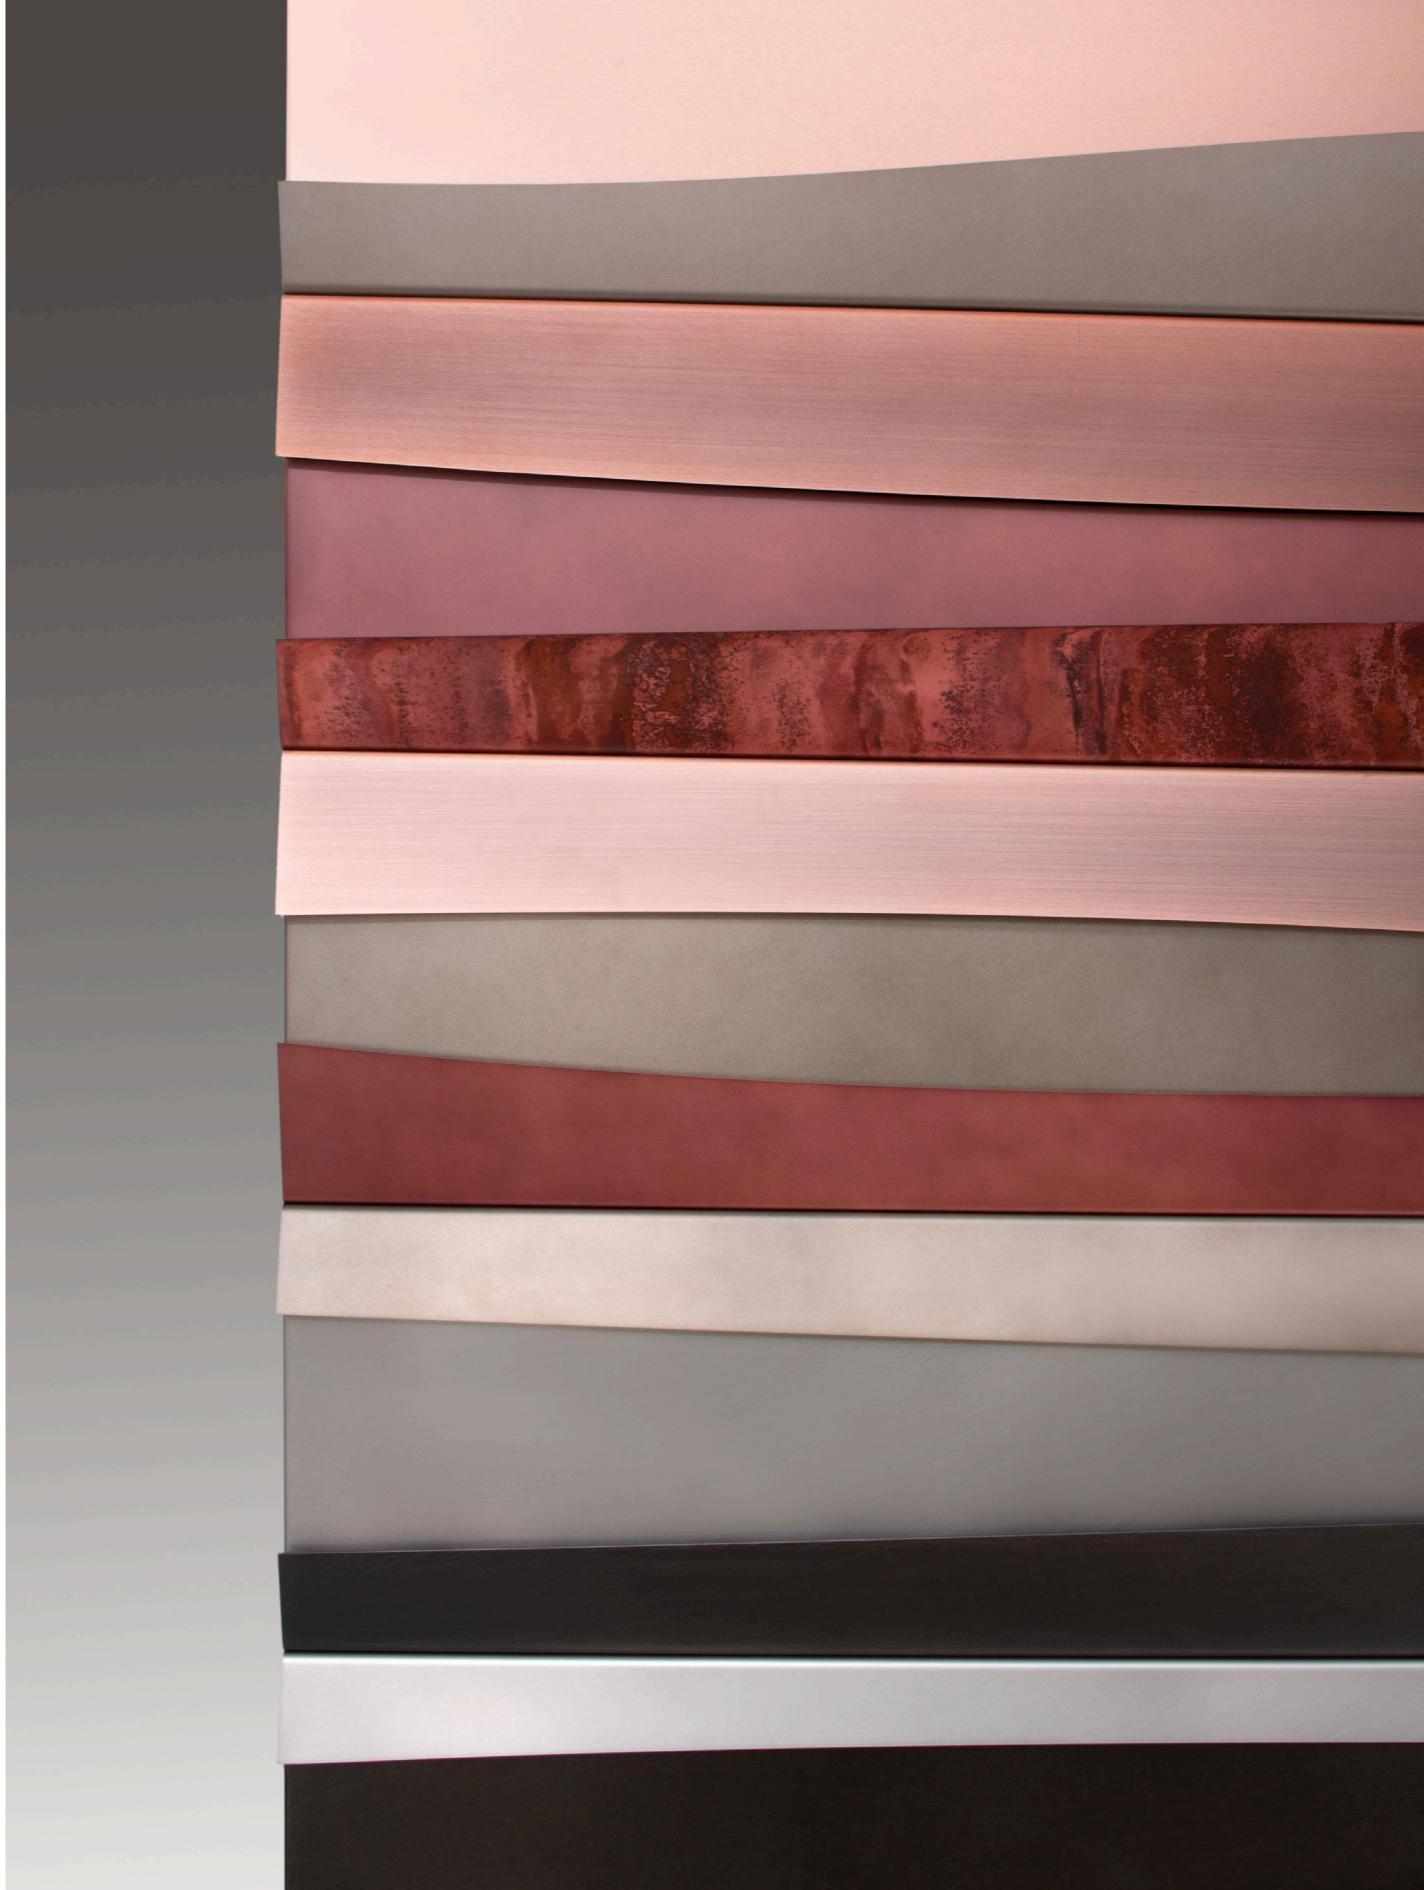

Come un paesaggio geologico, Sedimenti racconta il passaggio del tempo attraverso una stratificazione materica che richiama i processi della natura. Il risultato è una superficie espressiva e dinamica, capace di suscitare stupore ed esaltata dalla combinazione di elementi che la animano.

Dorico Wall cladding

DESIGN BY R&D DE CASTELLI

Inspired by the well-defined fluting of classic Greek columns, the Dorico cladding system is composed of concave modular elements where material and function are transposed to create a reference to memory.

Ispirato alla rastrematura classica della colonna greca, il sistema di rivestimento Dorico è composto da elementi modulari concavi dove la trasposizione materica e di funzione crea un rimando alla memoria.

Sinestesia Coffee tables

DESIGN BY TIPSTUDIO

The purity of curves and the dialogue between positive and negative space find new expression in the coffee table versions of Sinestesia. Maintaining the sculptural elegance of the original console, this new version exalts its lightness and versatility, enriching living spaces with the same textural intensity.

La purezza delle curve e il dialogo tra pieni e vuoti trovano una nuova espressione nella versione coffee tables di Sinestesia. Conservando l'eleganza scultorea della consolle, questa nuova declinazione ne esalta la leggerezza e la versatilità, impreziosendo gli spazi dell'abitare con la stessa intensità materica.

Caleide Lighting

DESIGN BY FEDERICA CAMMAROTA

Each lamp of the Caleide collection takes shape via unique geometric compositions which harmoniously entwines light and metal. Steel, brass and copper alternate in oxidised and brushed finishes, enriched by an interplay of forms which elevate the metal sheet in a polychromatic mosaic, a canvas which stimulates the senses of the observer.

Ciascuna lampada della collezione Caleide si identifica in peculiari composizioni geometriche che intrecciano armoniosamente luce e metallo. Acciaio, ottone e rame, in un'alternanza di finiture ossidate e spazzolate, nobilitano i giochi di forme trasformando la lastra di metallo in un mosaico policromo, una tela che stimola la percezione sensoriale di chi la osserva.
